## Pre-Seed Investment

FINANCIALEDGE<sup>7</sup>

## Process term sheets (and risk and reward) of very early-stage investing

FINANCIALEDGE<sup>7</sup>FINANCIALEDGE<sup>7</sup>

# When to Invest in an Early-Stage Company?

FINANCIALEDGE<sup>7</sup>

## Seeking Early-Stage Investment

### SEED STAGE

Company or business model is very new

Still determining proof of concept

Needs investment for growth  
(Pre-sales and no near-term profitability)

Hard to determine a valuation

Attract investors with access to equity  
at a price determined in the future

## Seeking Late-Stage Investment

### SERIES A FUNDING ROUND AND BEYOND

Company established and  
conducting business

Generating sales and hopefully profits

Client base determined

Needs investment for growth

Easier to determine a valuation

Attract investors with a set valuation  
and by offering equity

FINANCIALEDGE<sup>7</sup>

# “Early Stage Unpriced” vs “Later Stage Priced” Rounds

FINANCIALEDGE<sup>7</sup>

## “Priced” Round

Typical for a company **AFTER** early-stage investment (seed) rounds

Conventional way to **invest**, based on revenue, profits and cash flows

Agreeing a **valuation** with investors is easier

Investors purchase shares in the company at a price determined by that **valuation**

## “Unpriced” Round

Suitable for **very early-stage** investing

The startup company is NOT given a **valuation**

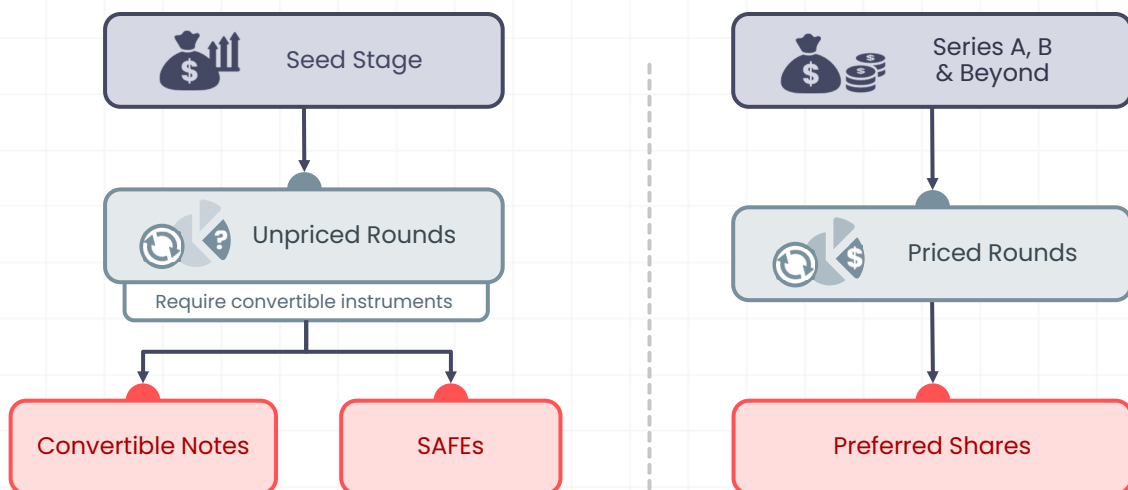

Investors are not purchasing a **known amount of equity shares**

Investors provide **capital now** for the purchase of shares in a **FUTURE priced round**

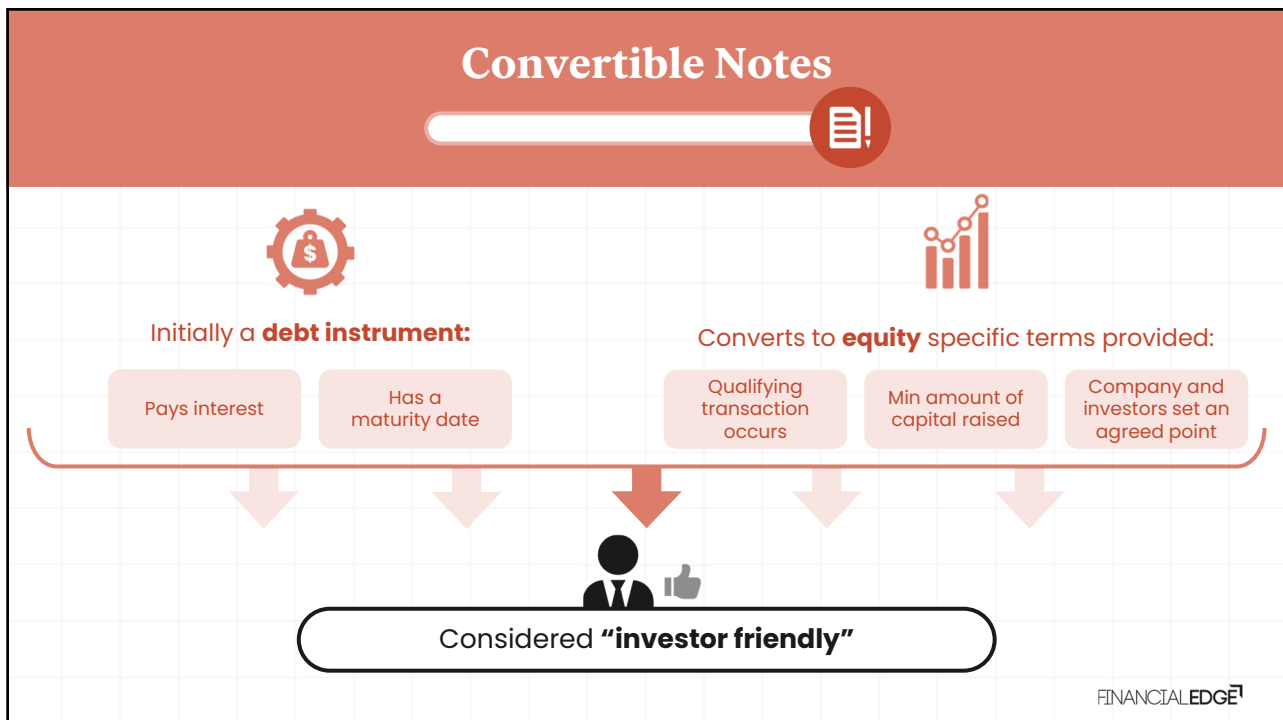

FINANCIALEDGE<sup>7</sup>

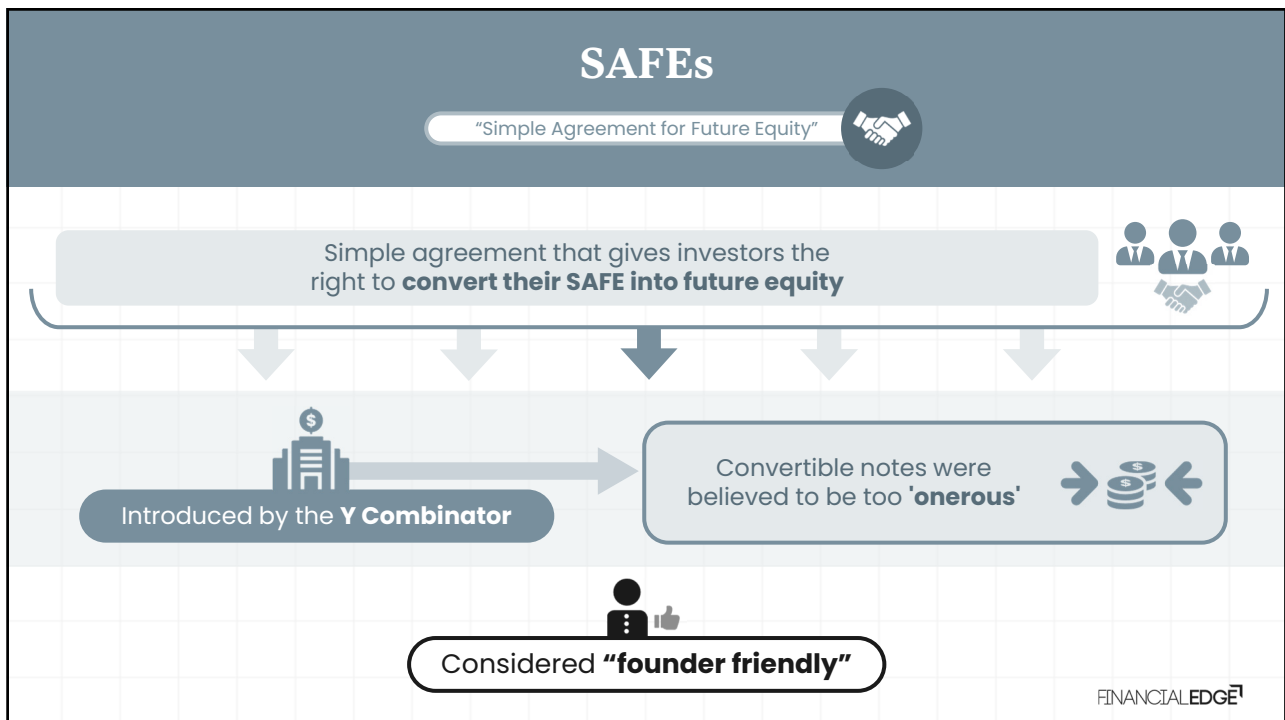

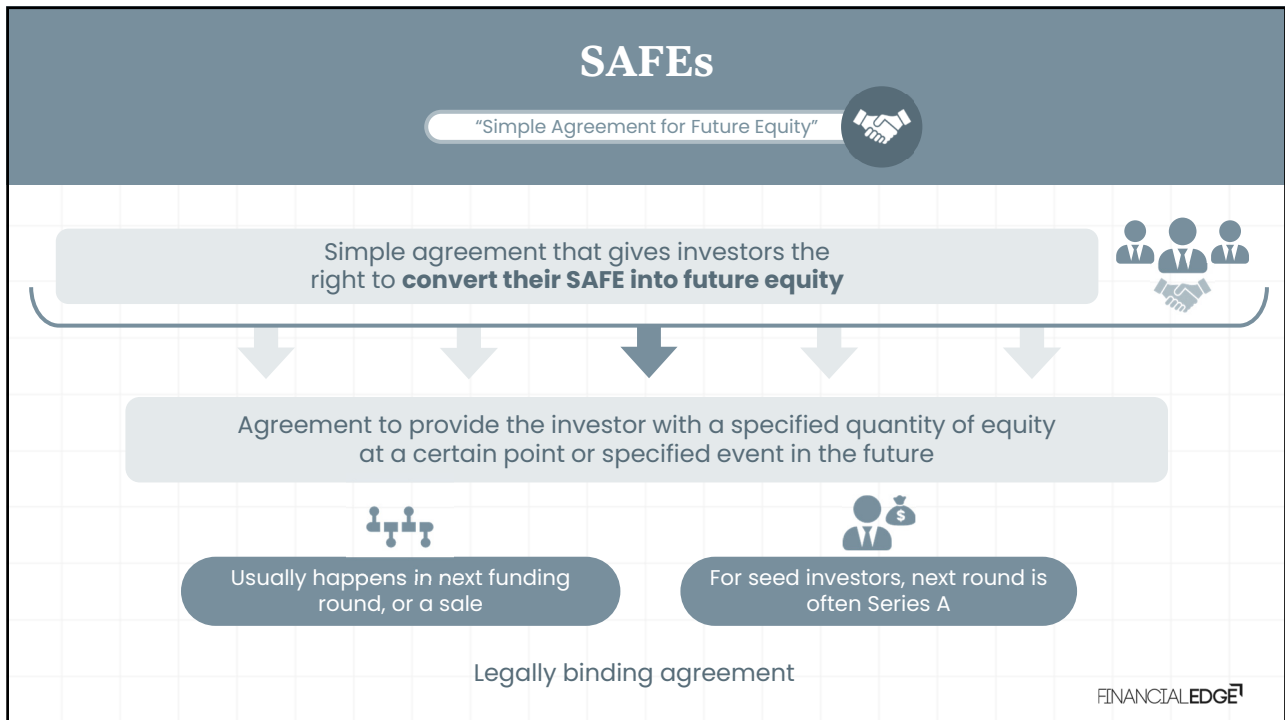

# Convertible Notes vs SAFEs

FINANCIALEDGE<sup>7</sup>

**"SAFE" = Simple Agreement for Future Equity**

FINANCIALEDGE<sup>7</sup>

## Discount Rates in “Unpriced” Rounds

FINANCIALEDGE<sup>7</sup>

Discount Rate

Valuation Caps

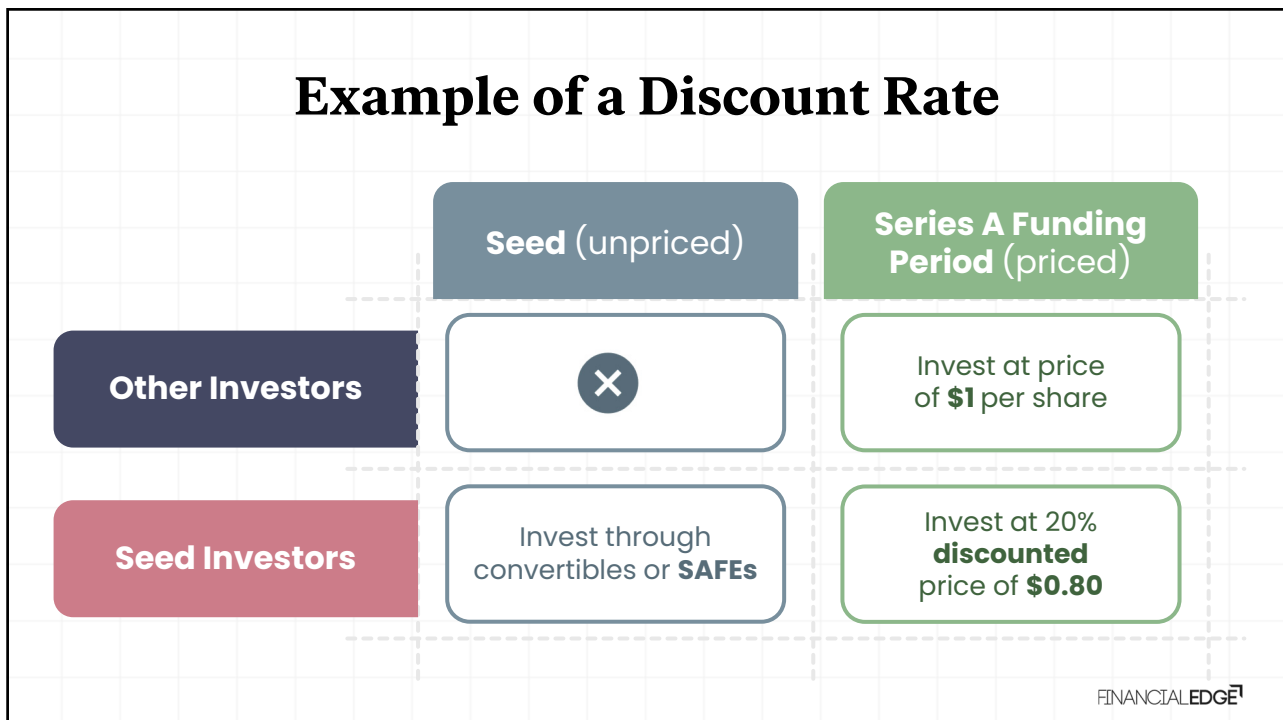

Apply to

Convertible Notes and SAFEs

FINANCIALEDGE<sup>7</sup>

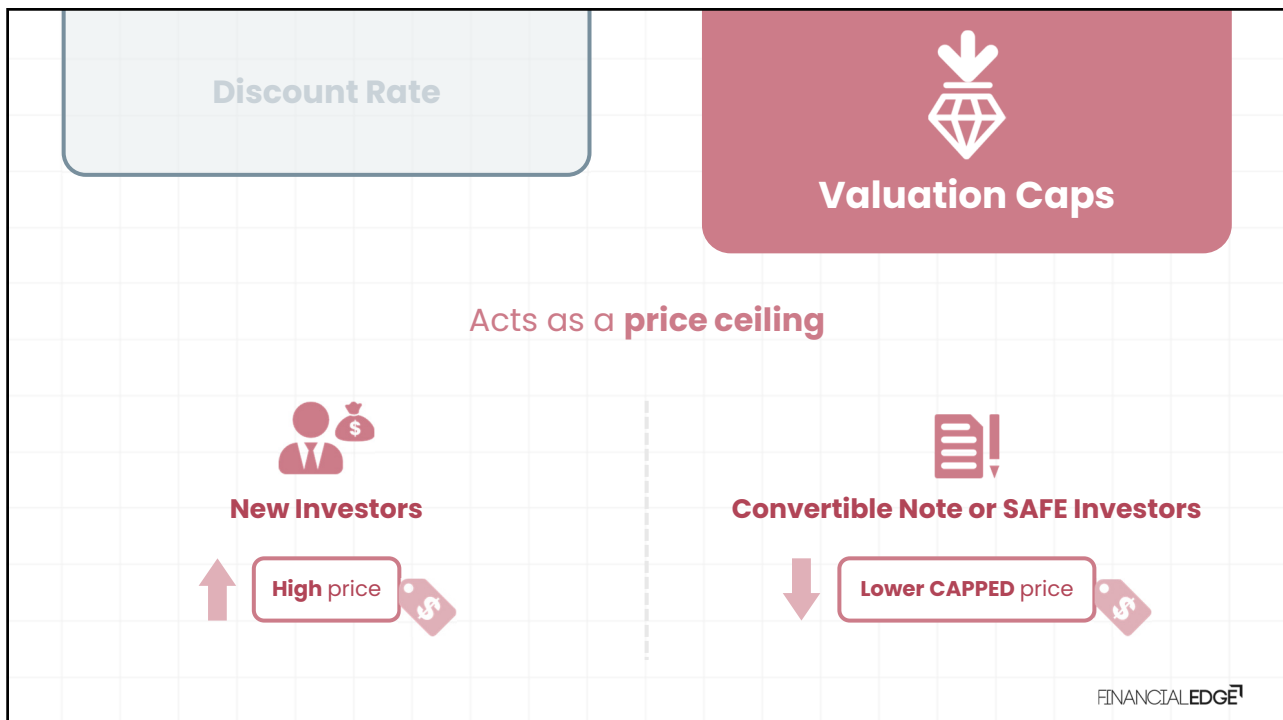

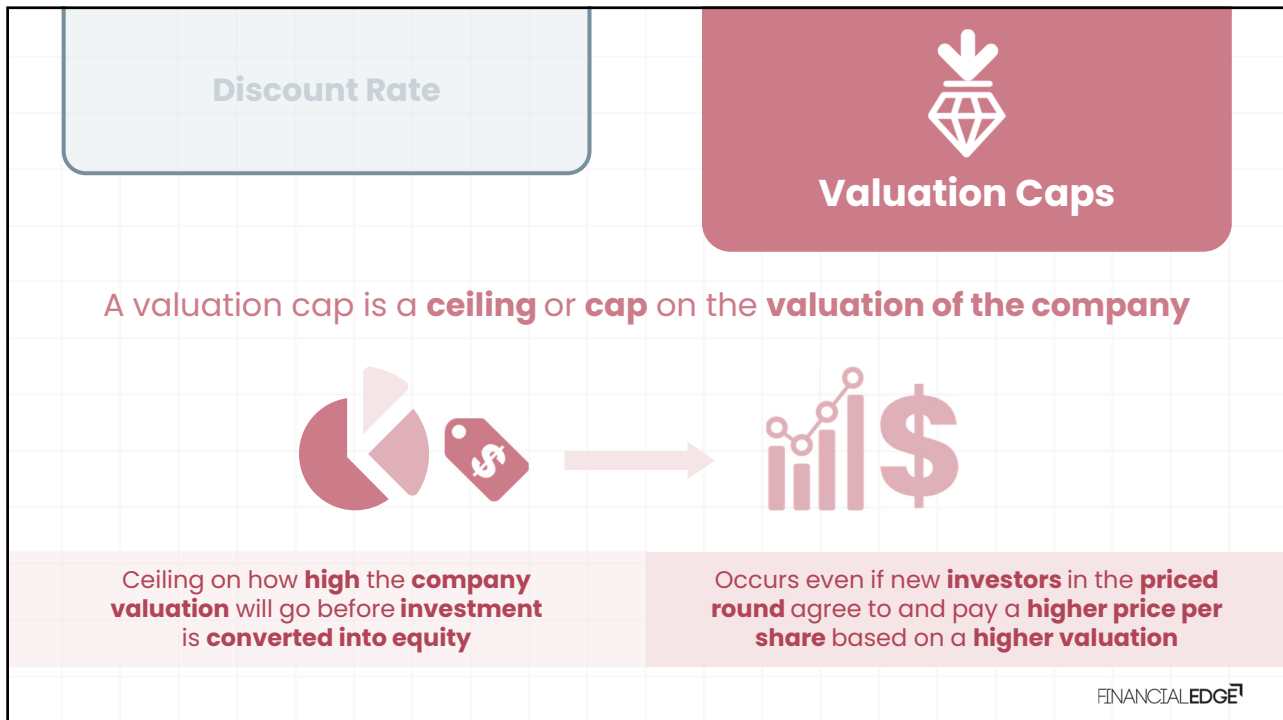

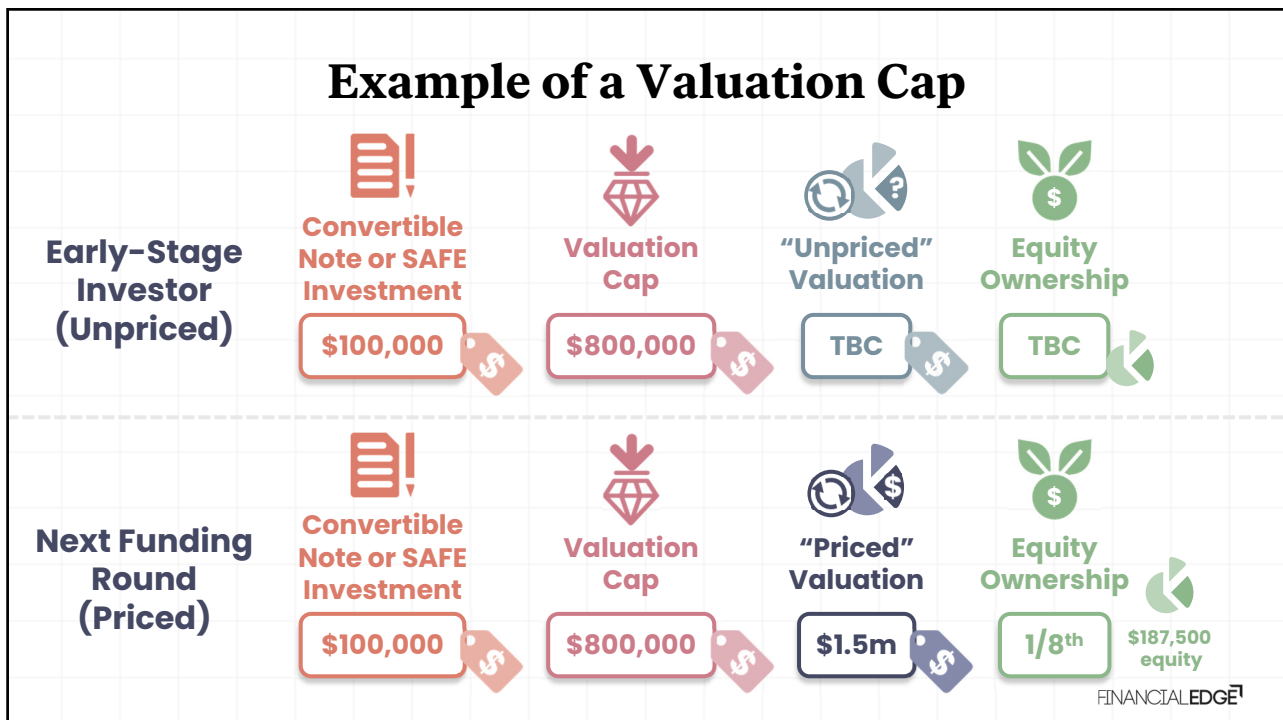

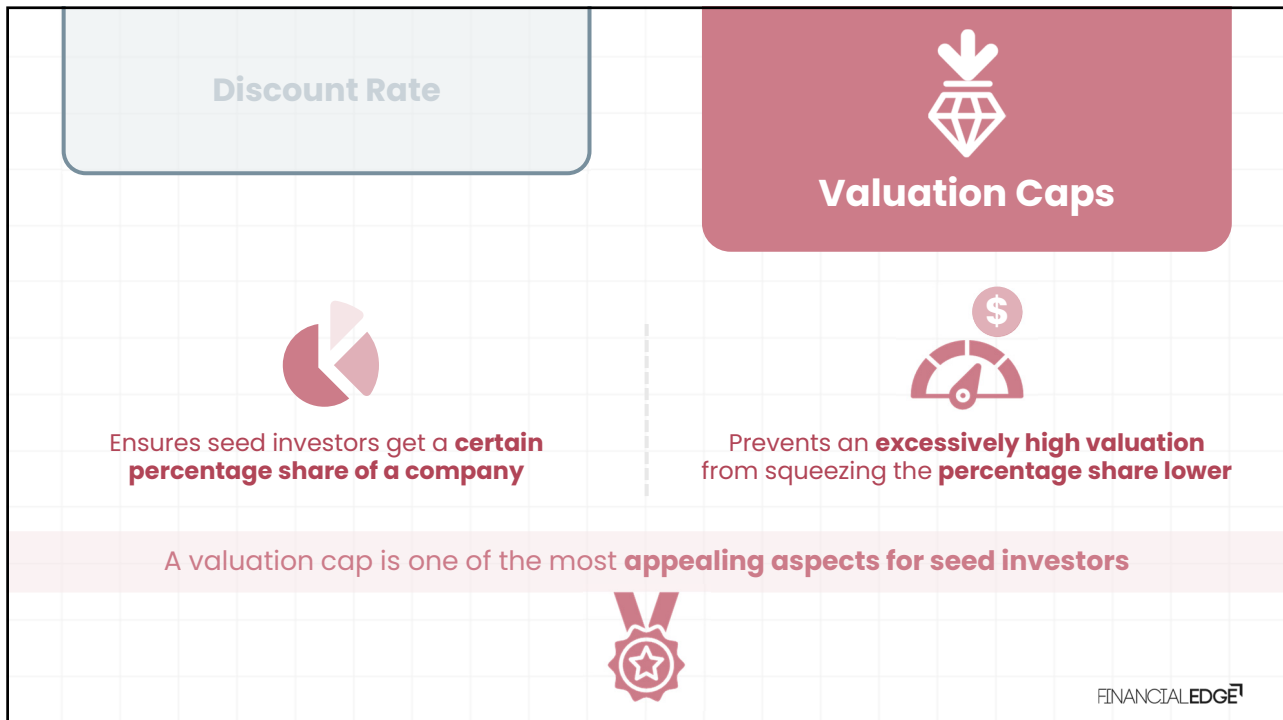

# Valuation Caps in “Unpriced” Rounds

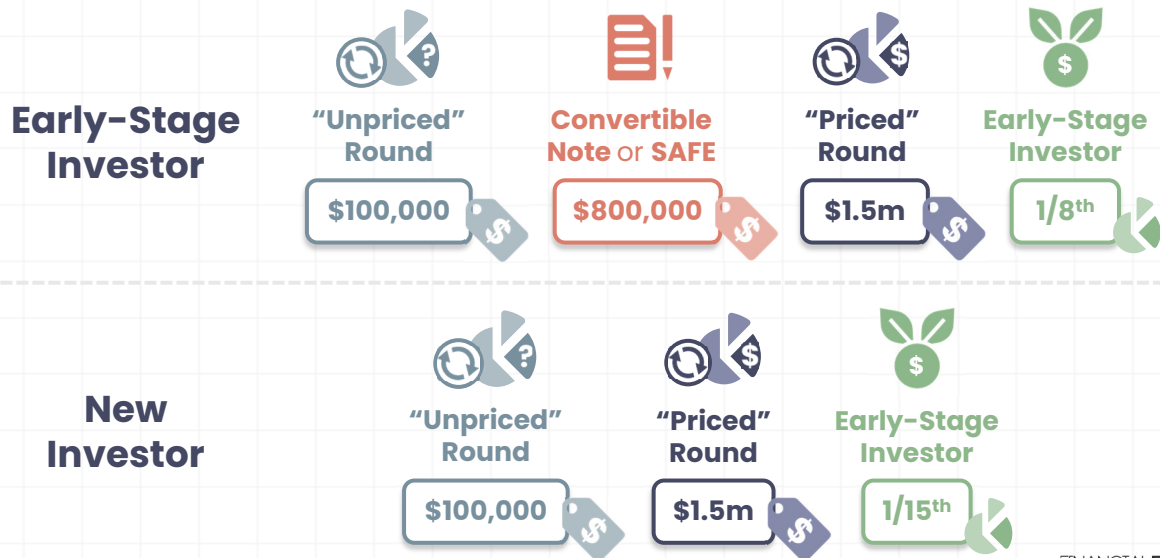

**Discount Rate**

**Valuation Caps**

## Example of a Valuation Cap

  
Discount Rate

  
Valuation Caps

  
Bonus shares

Reward for taking **higher risk**

Investing early

Investor typically gets **exercise the option** that gives them the **lowest conversion price per share**

FINANCIALEDGE<sup>7</sup>

# Early-Stage “Unpriced” Round Example

FINANCIALEDGE<sup>7</sup>

Initial Capitalization		\$10mm Common Shares at \$1/Share	
Unpriced Round		\$1.5mm Seed Round, Unpriced SAFE	
	Initial Investment	Discount Rate	Valuation Cap
Investor A	\$500,000	20%	-
Investor B	\$500,000	-	\$10mm
Investor C	\$500,000	20%	\$10mm
Priced Round		\$10mm Series A Round, \$15mm Pre Money, \$1.50/Share	
	Conversion Price / Share		No. of Shares
Investor A	\$1.20	$\left( \frac{\$1.50 \times}{(1-20\%)} \right)$	416,667 (\$500k / 1.20)
Investor B	\$1.00	$\left( \frac{\$10mm}{10mm} \right)$	500,000 (\$500k / 1.00)
Investor C	\$1.00		500,000

FINANCIALEDGE<sup>7</sup>

## Most Favored Nation ("MFN") Clause in SAFEs

FINANCIALEDGE<sup>7</sup>

### Most Favored Nation Clause

MFN clause allows **early investors to request** and **receive identical provisions** included in later issued notes, particularly if they are considered **more favorable**

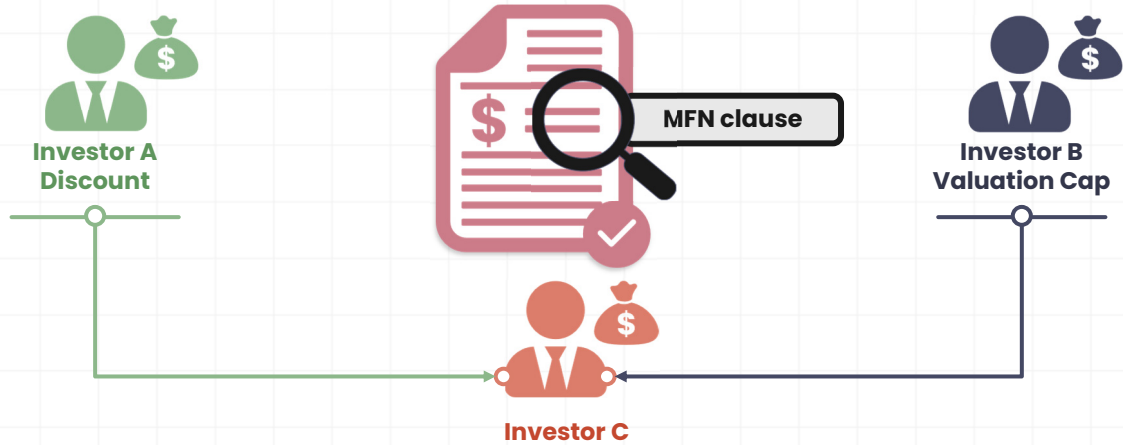

Included in **SAFEs**

They lend themselves more to a **fundraising process** on a **"rolling basis"**

FINANCIALEDGE<sup>7</sup>

Three investors **invest** in an early-stage company at **different times**, each receiving a **different reward**

If **Investor A** and **B** had the **MFN clause** in their **SAFE**, then they would receive the **same terms** as **Investor C**

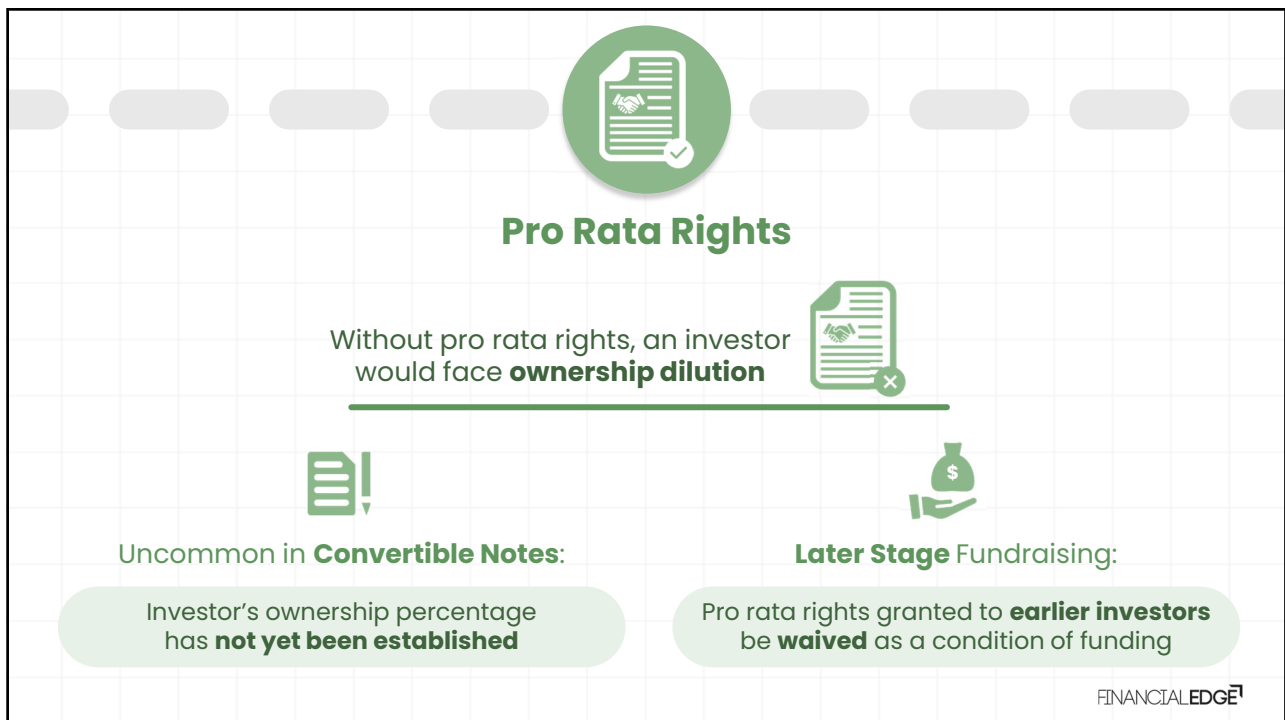

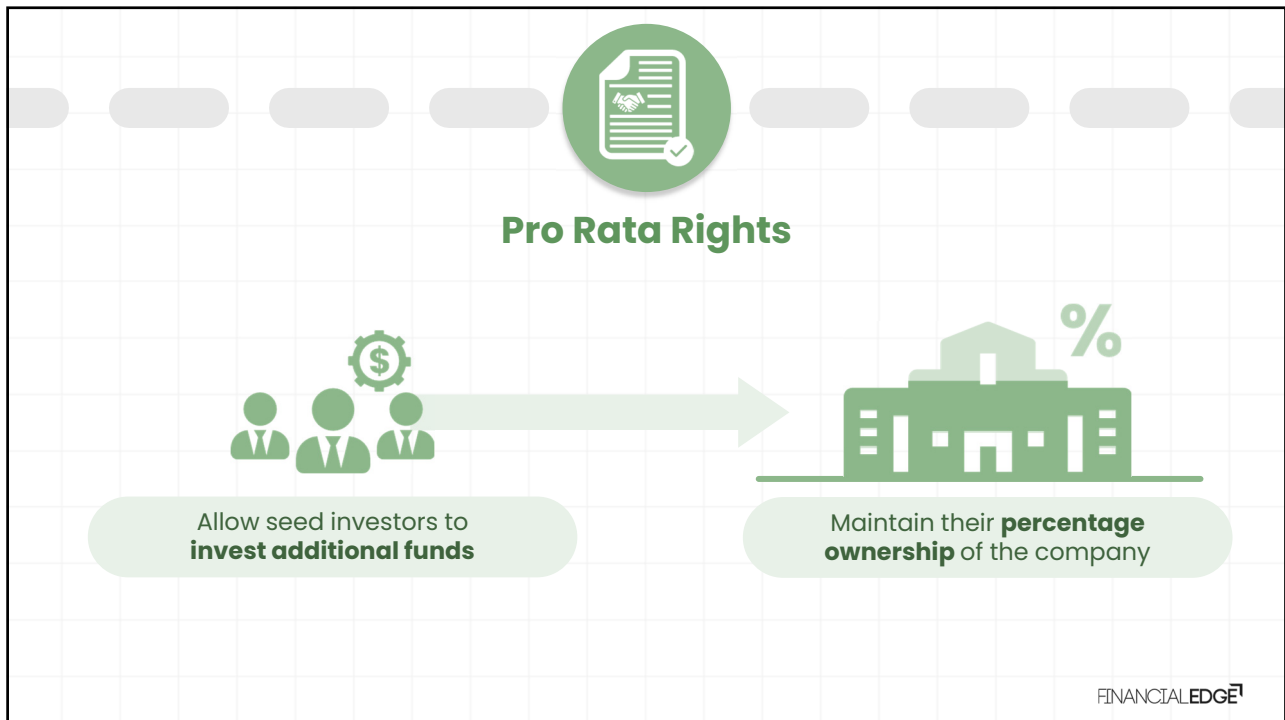

It would allow them to **CHOOSE** between the **discount rate** and the **valuation rate**, **whichever is best**

FINANCIALEDGE<sup>7</sup>

## Pro Rata Rights

FINANCIALEDGE<sup>7</sup>

## Other Differences Between Convertible Notes and SAFEs

### What Are The Differences?

	Convertible Note	SAFES
Convertible security	Debt	Not debt
Interest bearing	Yes (interest converts along with principal)	No
Maturity date	Yes	No
Discounts	Yes	Yes
Valuation Caps	Yes; pre-money valuation cap	Yes; either pre- or post-money valuation caps
Most favored nation (MFN)	Not usually	Yes
Pro Rata Rights	Not usually	Yes
Payouts (Early Exits)	Yes	Yes
Conversion Thresholds	Yes	No

## What Are The Differences?

	Convertible Note	SAFEs
Convertible security	Debt	Not debt
Interest bearing	Yes (interest converts along with principal)	No
Maturity date	Yes	No
Discounts	Yes	Yes
Valuation Caps	Yes; pre-money valuation cap	Yes; either pre- or post-money valuation caps
MFNs	Not usually	Yes
Pro Rata Rights	Not usually	Yes
Payouts (Early Exits)	Yes	Yes
Conversion Thresholds	Yes	No

FINANCIALEDGE<sup>7</sup>

	Convertible Note	SAFEs
Payouts (Early Exits)	Yes	Yes

### Convertible notes and SAFEs have provisions that address "Payouts"

Change in control

Investor has the **option** of **conversion** to **equity** at the **valuation cap** or a **1x payout**

Convertible note could lead to **bankruptcy**

**SAFE notes in contrast**, are **not loans**, and therefore do not have to be **repaid**

FINANCIALEDGE<sup>7</sup>

	Convertible Note	SAFEs
Convertible security	Debt	Not debt
Interest bearing	Yes (interest converts along with principal)	No
Maturity date	Yes	No
Discounts	Yes	Yes
Valuation Caps	Yes; pre-money valuation cap	Yes; either pre- or post-money valuation caps
Most favored nation (MFN)	Not usually	Yes
Pro Rata Rights	Not usually	Yes
Payouts (Early Exits)	Yes	Yes
Conversion Thresholds	Yes	No

## SAFEs

Early-stage startups

## Convertible Notes

Medical devices

Hardware

Biotech

FINANCIALEDGE<sup>7</sup>

	Convertible Note	SAFEs
Convertible security	Debt	Not debt
Interest bearing	Yes (interest converts along with principal)	No
Maturity date	Yes	No
Discounts	Yes	Yes
Valuation Caps	Yes; pre-money valuation cap	Yes; either pre- or post-money valuation caps
Most favored nation (MFN)	Not usually	Yes
Pro Rata Rights	Not usually	Yes
Payouts (Early Exits)	Yes	Yes
Conversion Thresholds	Yes	No

## Found in Convertible Notes

States the **threshold or range** for converting the initial **debt component into equity**FINANCIALEDGE<sup>7</sup>
